

Your Hotel

A digital experience for hotel guests, to make them feel at home while away from home.

THE PROMPT

Many hotel chains have loyalty programs to reward travelers who routinely stay with them. With the advent of affordable home automation and streaming media, hotel rooms can be transformed into customizable environments which adapt to suit the preferences of their current occupant. Design a digital experience for a guest of such a hotel which will make them feel at home while away from home

Home:

The home screen always displays the current local time, the room temperature setting and the alarm time if there is an alarm set.

1

Main Menu:

Set Alarm: Set an alarm in the current local time.

Home Sweet Home: Set your room to be perfect when you get there.

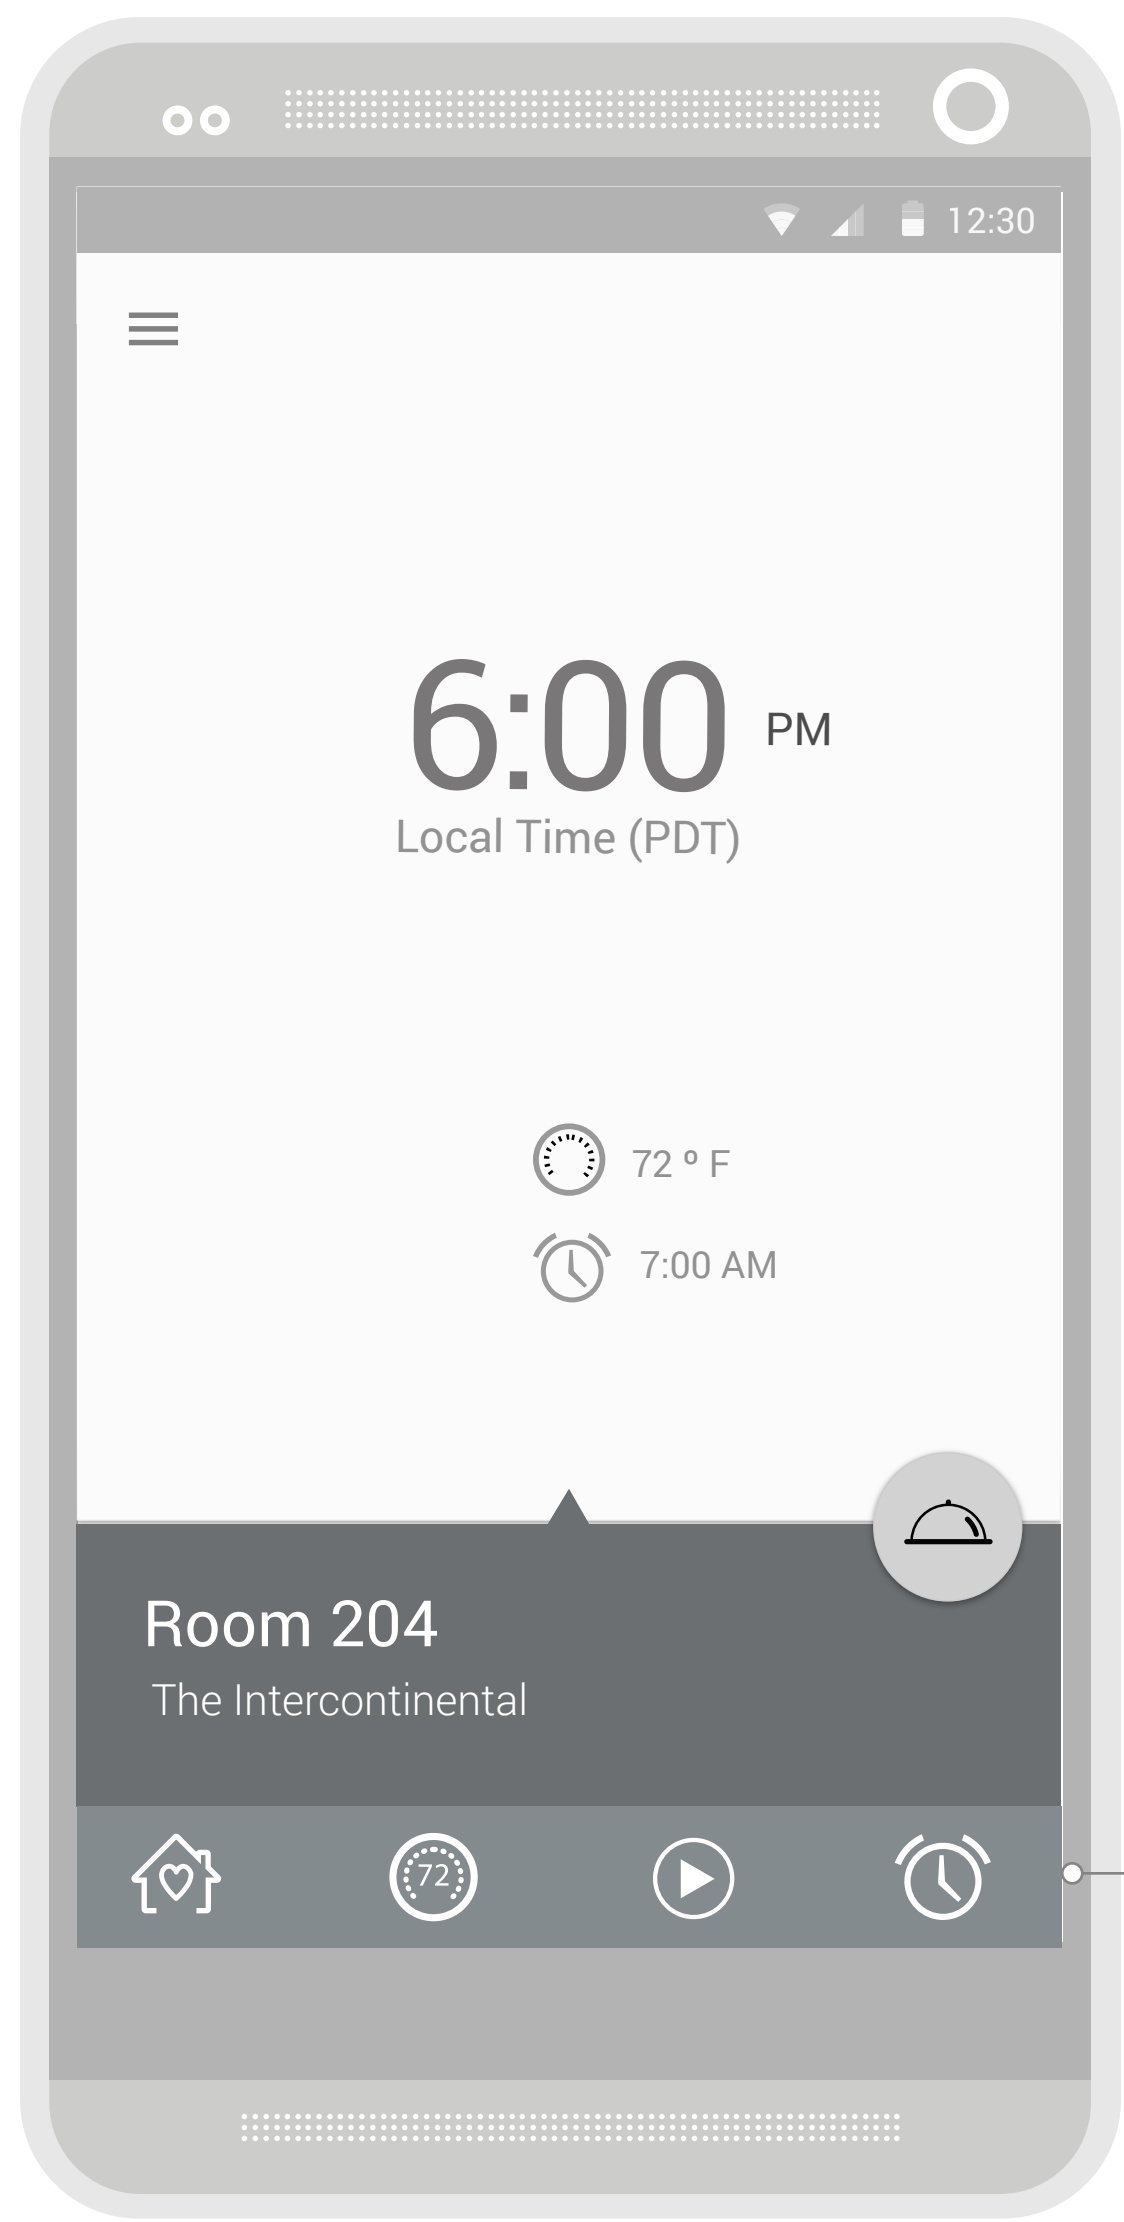

Thermostat: Set room temperature. If the user has a Nest account the thermostat will behave as it does at home.

Room Service: Request room service.

Media: Surf through your favorite entertainment services and play your favorite music/shows in the hotel room's entertainment system

Account Menu:

- a My Account:** Handle basic account settings, payment options, password, email.
- b Upcoming trips:** Shows upcoming trips and reservations. Data comes from Google Now.
- c Fidelity Programs:** Search for your favorite hotels and link those accounts to 'My Room'.
- d Link Media Accounts:** Link the user's current media accounts (Netflix, Hulu, iTunes, etc) so they can be accessed from the room's TV. It should also allow to access shows recorded on the user's home smart TV.
- e Link Nest Account:** If the user has a Nest device at home, he can link his Nest account to 'My Room' so the hotel's thermostat will behave just like it does at home.

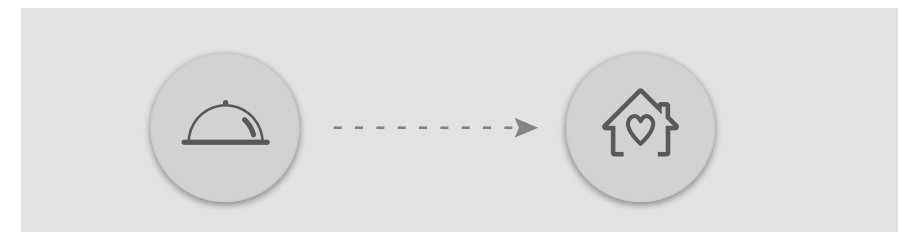

2

Home (cont.):

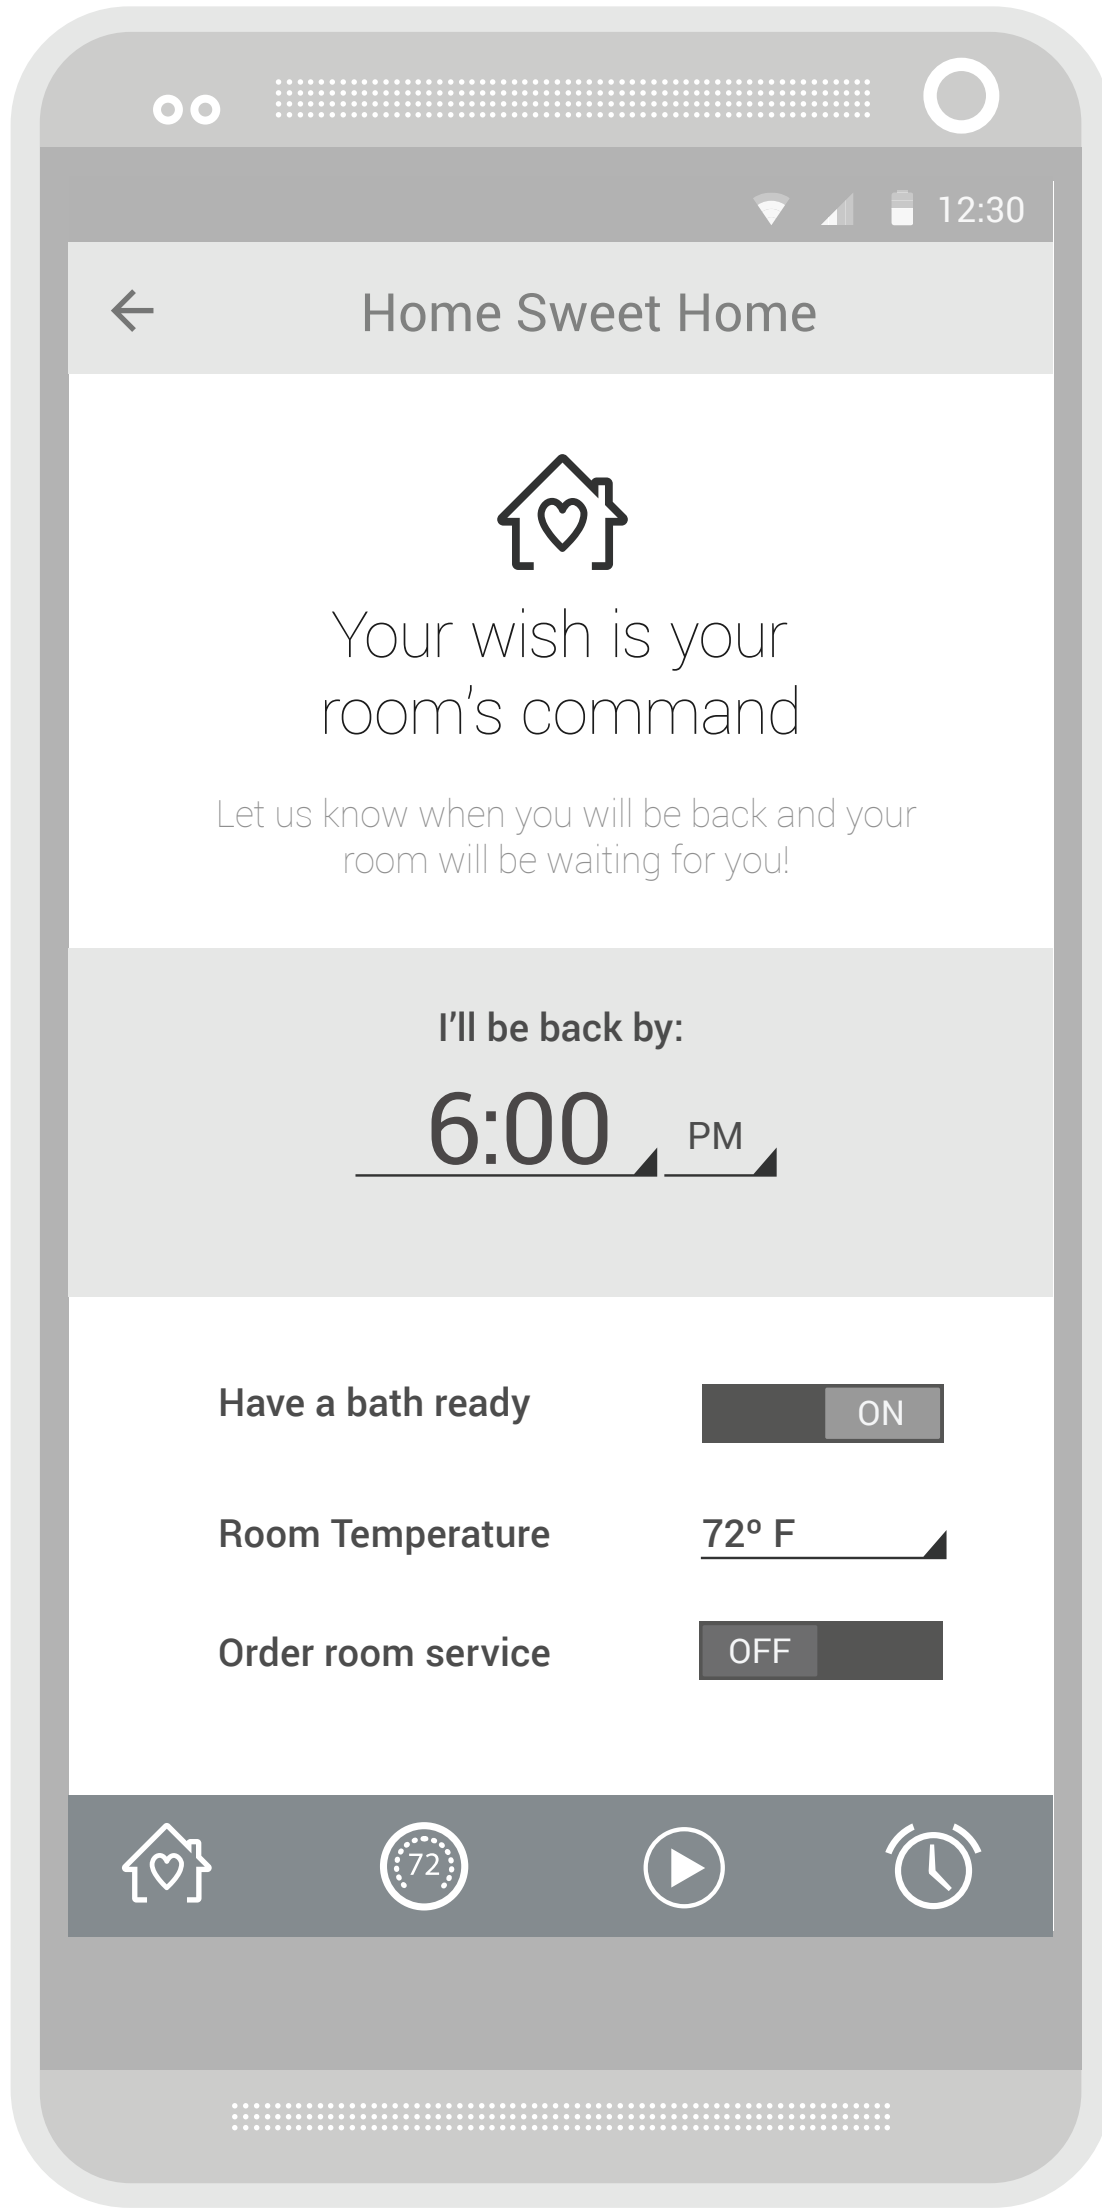

More information is available when scrolling down.
Updates: Display list of scheduled room events.

2

Main action: The system should be smart enough to tell whether the guest is at the room or not.

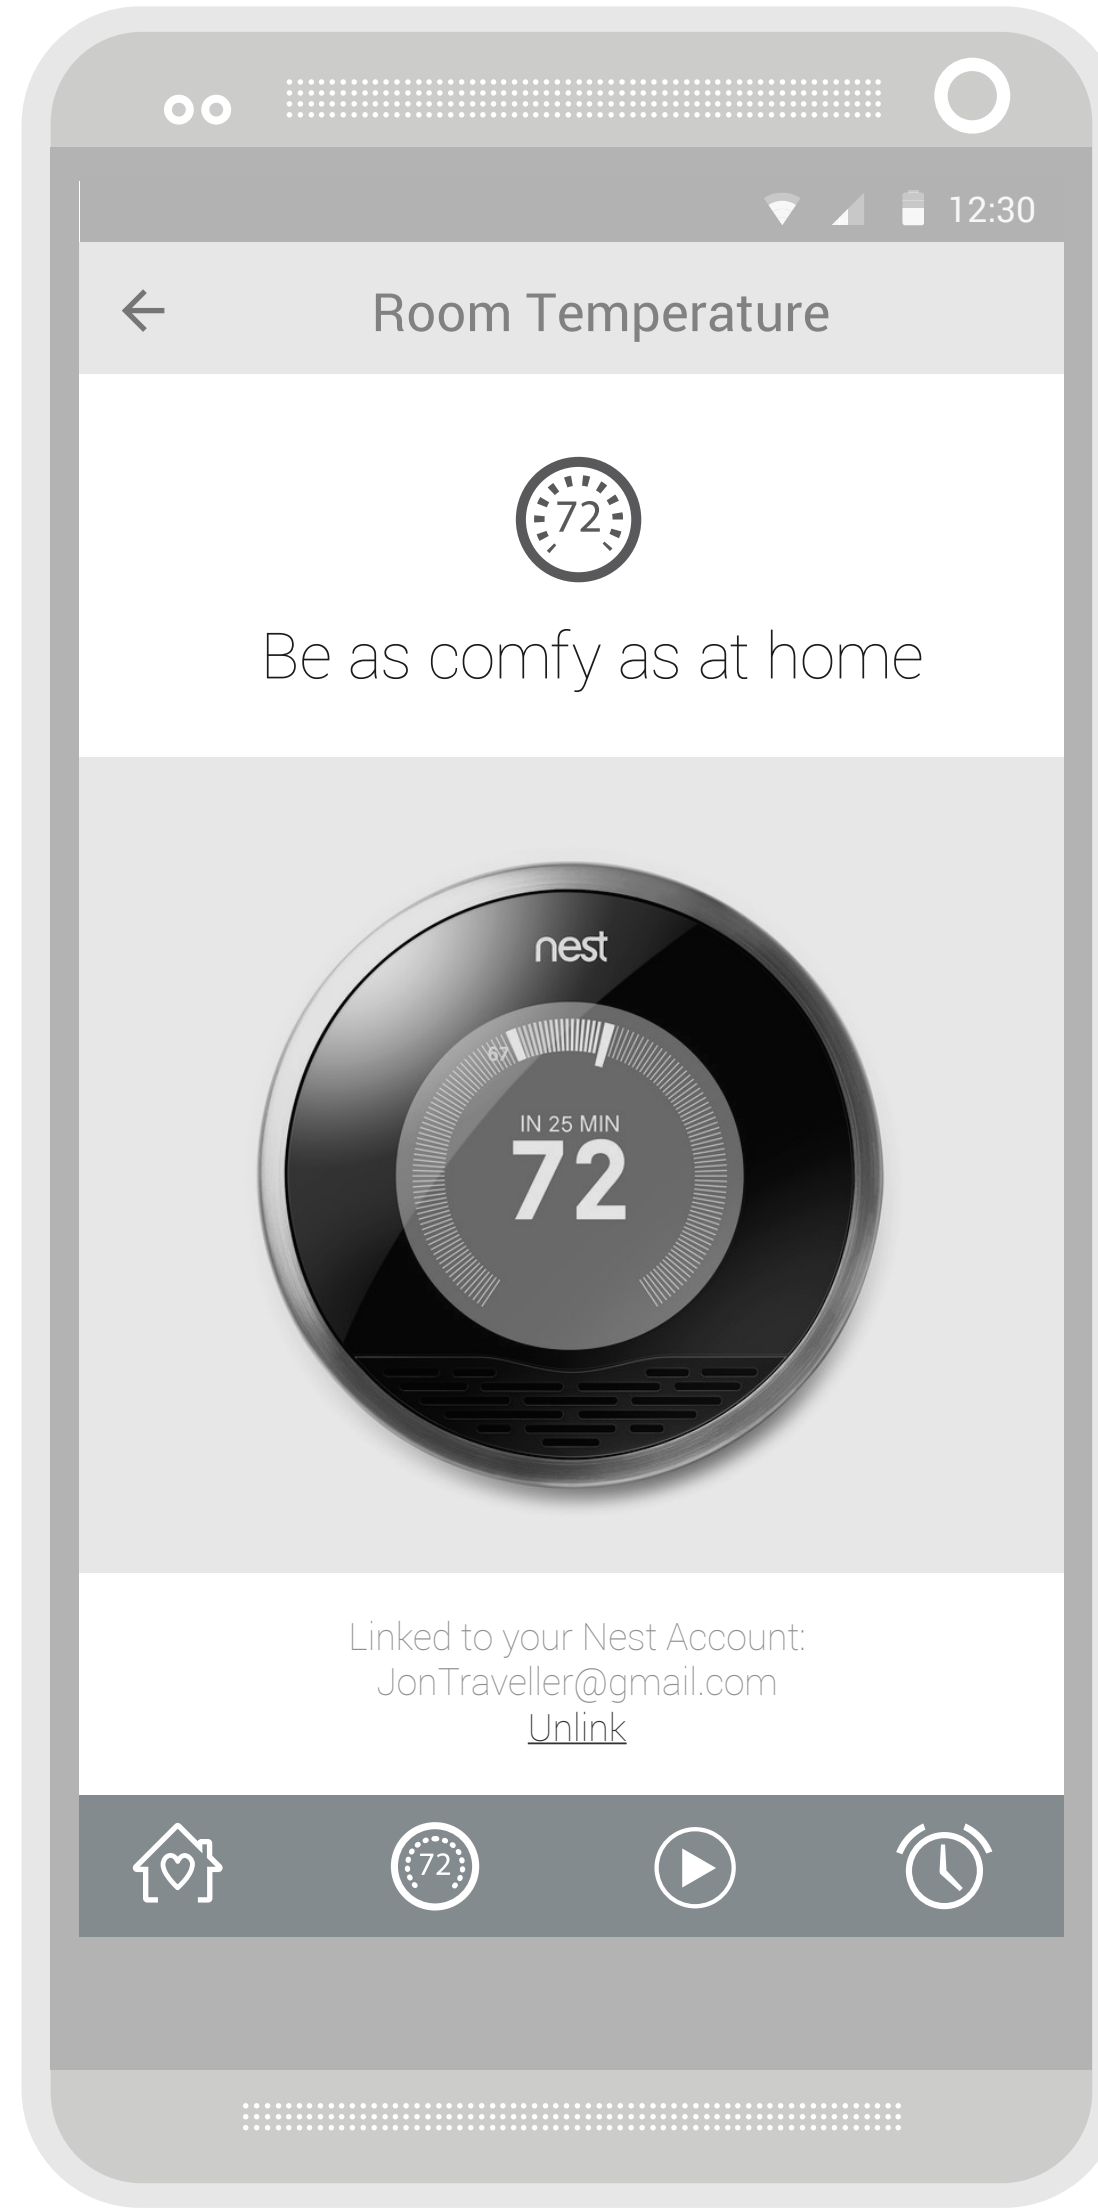

Whenever the guest is outside the hotel, the main action should change to "Home Sweet Home," allowing him to set his room preferences for his return time.

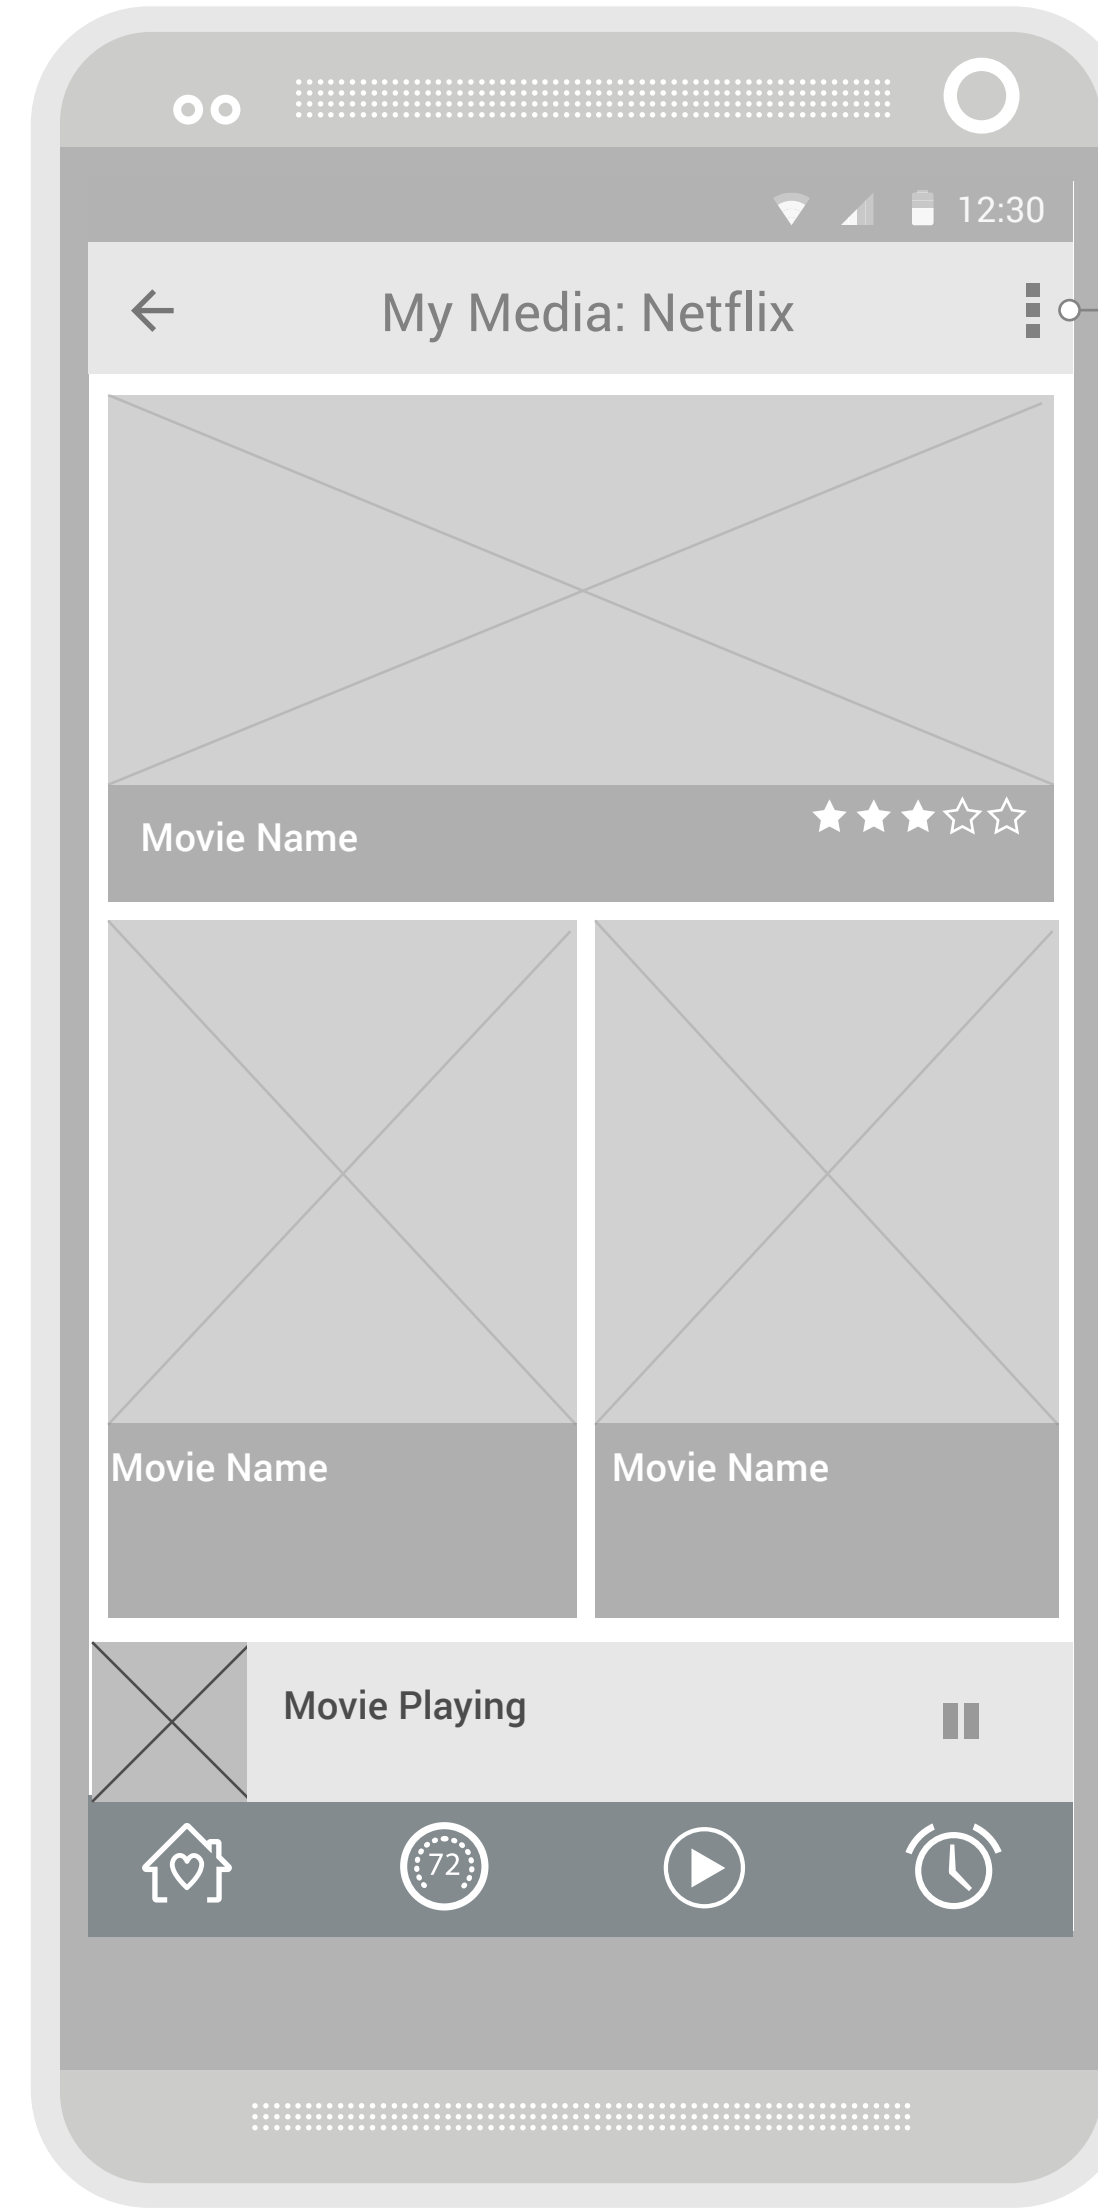

Home Sweet Home

Get your room all set to receive you after a long day!

Home Sweet Home

Adjust the room's temperature. If the user has a Nest account the thermostat will behave as it does at home.

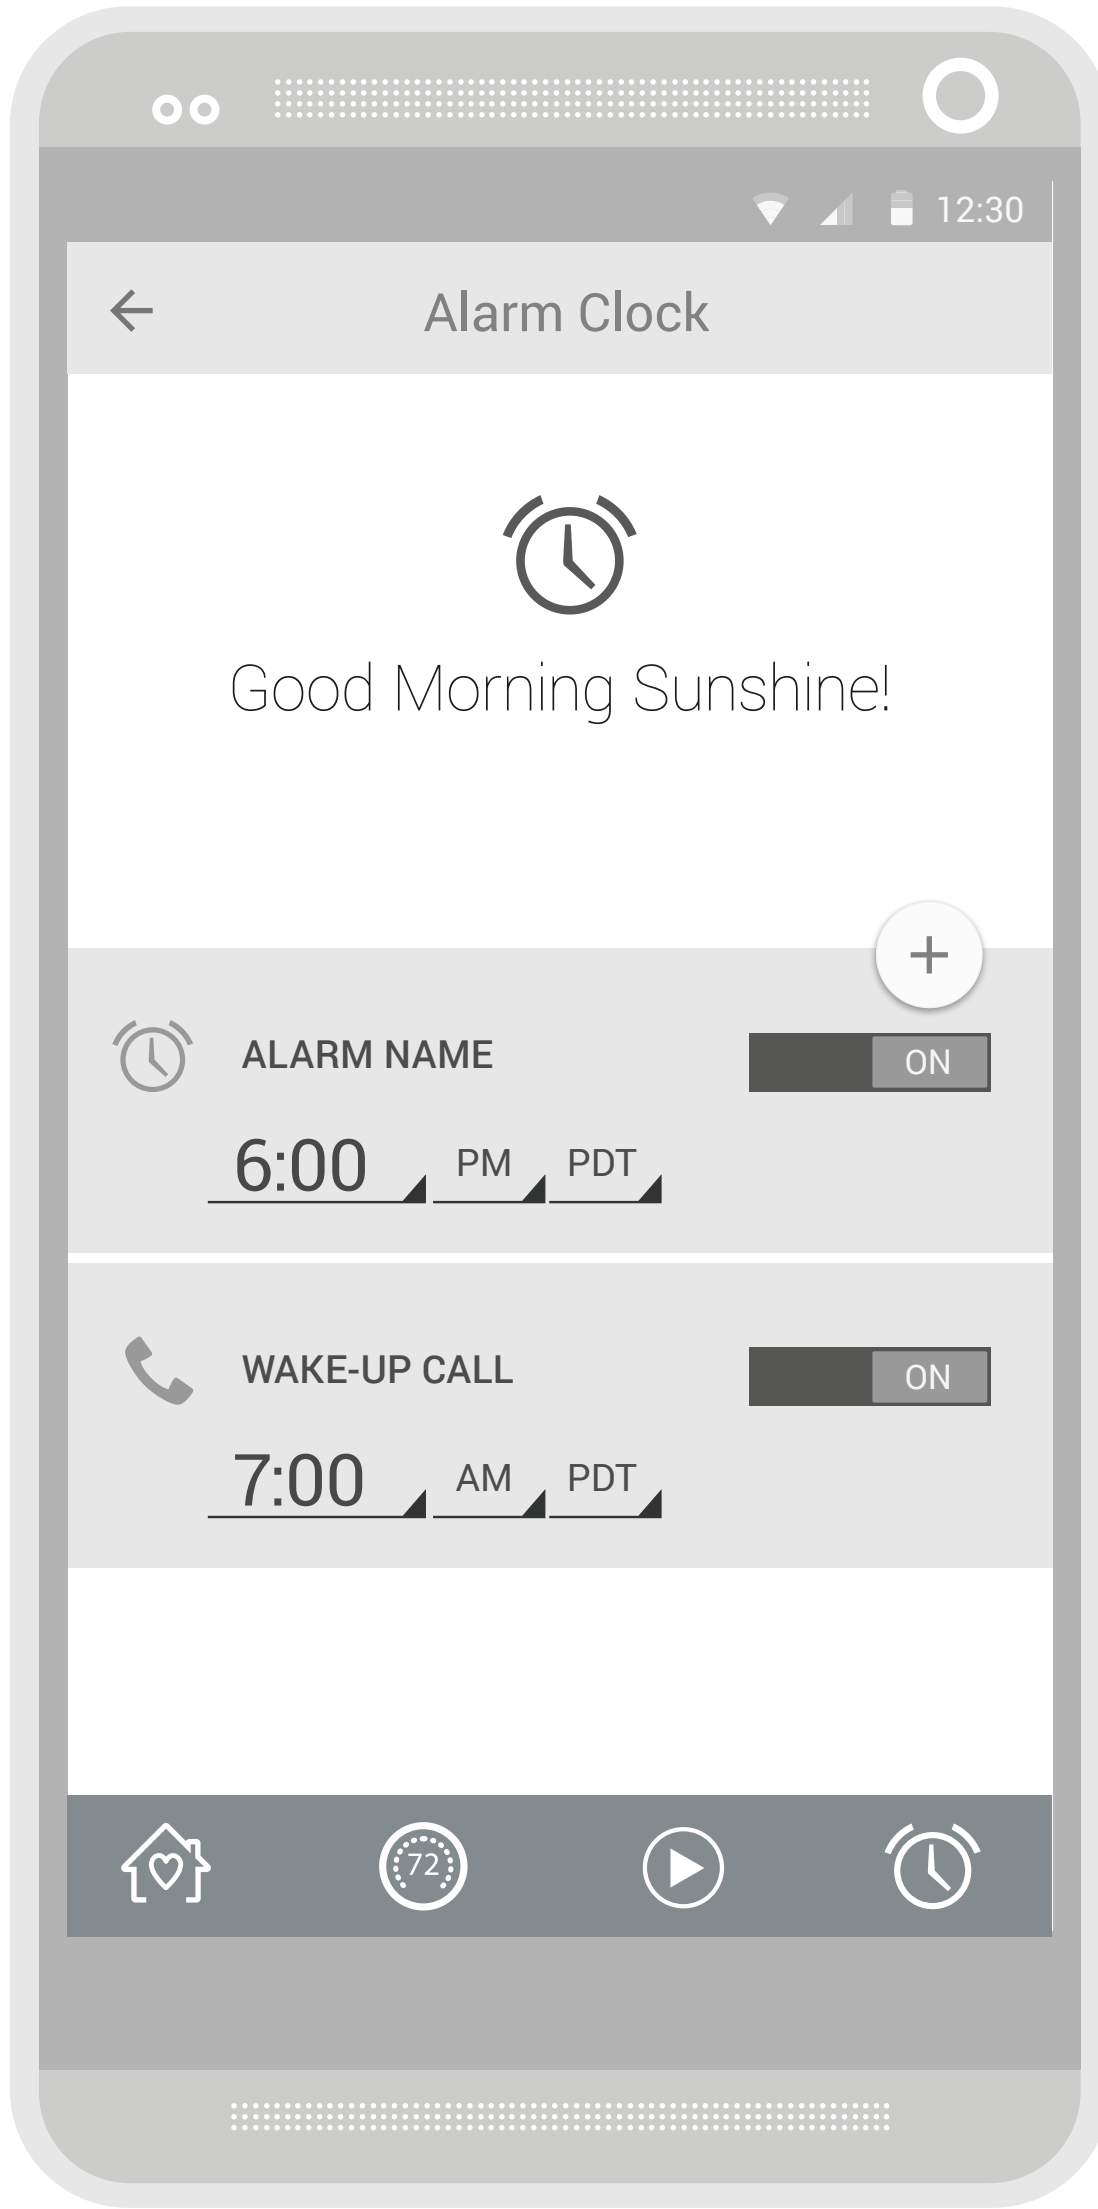

Media Center

Allows the user to search through his media favorites and play them on the room's entertainment center.

f

Options Menu: Shows all available media sources e.g. Netflix, iTunes, Hulu, etc.

Wake-up call

Adjust the room's temperature. If the user has a Nest account the thermostat will behave as it does at home.
